💼 Portfolio

in priyans619   ⌘ priyans619

SKILLS

Languages: C/C++, Java, JavaScript, Python3	**Databases**: SQL, MongoDB
Technologies : Node.Js, ReactJs, Next.Js, Tailwind CSS.	**Cloud**:Google cloud
Web Dev Tools: Figma, Krita, VScode, Git, Github	**OS**: Linux, Windows

EXPERIENCE

•Stashfin   *Jan 2023- Aug 2023*

Internship- Frontend Developer   Delhi,India

– Implemented an EMI loan calculator feature within the app, enabling users to easily calculate loan repayment schedules. This addition increased the app's utility and user engagement by 10%.
– Worked in User interface of octofin, an inbuilt customer support bot powered by yellow.ai which uses generative AI DAP (Dynamic Automation platform).
– Collaborated with the backend development team to seamlessly integrate the Google Vision API. Enabled users to capture high-quality images with guided instructions, optimizing data extraction accuracy.
– Developed a document scanner module that efficiently extracts data from images of documents like RC copies and PAN cards. This feature streamlined data input processes for users.

•Utopia Global   *Jan 2021 - July 2021*

Internship - Machine Learning   Banglore, India

– Led a project employing AI and deep learning techniques to compute option prices. Utilized a robust dataset of one million entries, composing of intrinsic and extrinsic value components.
– Demonstrated expertise in high-risk derivatives by designing algorithms for option pricing. Gained insights into risk evaluation and financial dynamics, highlighting proficiency in machine learning implementation.
– Successfully integrated quantitative finance and machine learning models that computed option premiums. This experience showcased the synergy (Quantitative Finance and ML Fusion)between advanced AI algorithms and financial instruments, enhancing proficiency in both domains.

•Artology.Boom   *June 2020 - Dec 2022*

Co-founder and Technical Head   Raipur, India

– I created an art page Artology.Boom and turned into e-commerce service by selling merchandise in form of hoodies and designed frame to the college students.
– Designed, Developed, and Deployed Django based full stack website for our startup - Artology.boom
– Dispatched more than 1000+ order across raipur city combined.

PROJECTS

•Crowdfunding Platform : ⌘

Developed a blockchain-based crowdfunding platform for smart contracts,integrated MetaMask for seamless Ethereum transactions.

– **Tech Stack**: ReactJs, ThirdWeb, Tailwind Css

•Moviemania - WebApp : ⌘

A react based movie application where you can search millions of movies and TV shows made using TBDB API for fetching data.

– **Tech Stack**: NodeJs, ReactJs, Scss

•Songify - MusicApp : ⌘

A Spotify inspired application with a homepage, a music player, search functionality,exploration features, and global top charts.

– **Tech Stack**: ReactJs, Vite, Tailwind Css

EDUCATION

•International Institute Of Information Technology - Naya Raipur   *2017-21*

Bachelor of Technology in Computer Science and Engineering   CGPA: 7.05/10

ACHIEVEMENTS AND LEADERSHIP POSITION

• B.Tech 2021 Best Thesis Award.
• Won District level Chess championship and qualified for State championship, Raipur.
